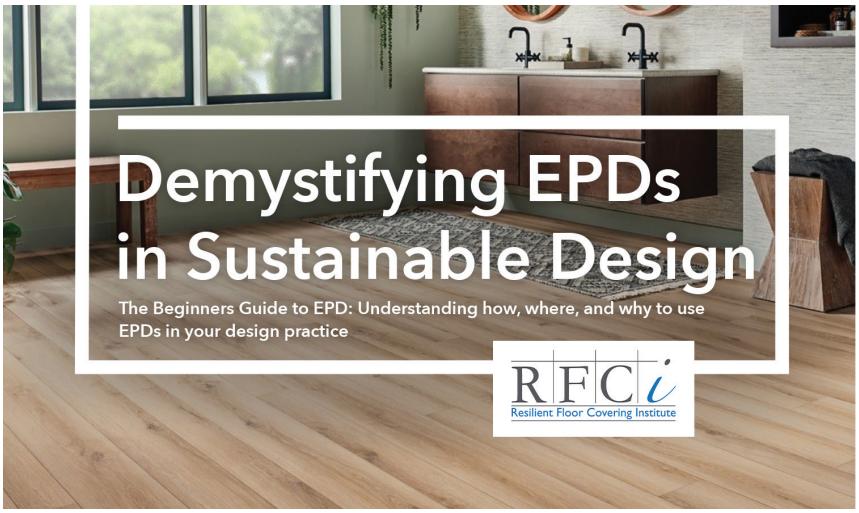
FOR IMMEDIATE RELEASE

RFCI announces a new CEU to "Demystify EPDs"

LAGRANGE Ga. (April 18, 2022) If you are an architect or designer, the Resilient Floor Covering Institute wants you to have a better understanding of Environmental Product Declarations (EPDs) since they are powerful tools in choosing materials for commercial projects.



Entitled "Demystifying EPDs in Sustainable Design," this AIA and IDCEC accredited course from RFCI is designed to be a beginner's guide, teaching the basic vocabulary and fundamentals of EPDs. Access here: https://bit.ly/37rbf14

"Understanding the ins and outs has never been more necessary," observed Jane Rohde, Technical Consultant with RFCI and author of this course. "You'll learn how to put EPDs to use in projects seeking certification in green building design."

Learning objectives include:

- Understanding the components of Type III EPD
- How to read data provided in a Type III EPD
- Understanding the application of EPDs to specific LEED and Green Globes rating criteria
- Understand how to use databases and resources to access Type III EPDs

The course will launch in a written version, with quiz and reporting of CES/CEU credit on IandS.com and will be available in the future in video and on other platforms.

Contact RFCI for more details.

About RFCI

The Resilient Floor Covering Institute (RFCI), based in LaGrange, GA, is the flooring industry's association that provides support for a network of global resilient flooring manufacturers and those in the supply chain. The mission of RFCI is to enhance the long-term growth and well-being of the North American resilient floor covering industry. RFCI strategic goals include managing issues that affect manufacturing, products, and the people who use them, and which typically emanate from federal and state government agencies as well as non-governmental agencies and activist groups. Other key goals include promoting the resilient flooring category, developing guidelines and certification programs to ensure the quality and sustainability of resilient flooring products, their installation, and maintenance, developing and managing technical product performance standards, and market education. https://rfci.com
